

Serial No. 09/756,453
Docket ADO 0069 PA

REMARKS

This Preliminary Amendment is being submitted to correct the specification to reflect the change in drawings from photographs to illustrated drawings. No new matter has been added. A response to the Notice to File Corrected Application Papers mailed 02/21/2001 is being filed simultaneously herewith (copy enclosed). Also enclosed for the Examiner's review is a copy of the corrected drawings which reflect the above amendments. Entry and consideration of this preliminary amendment in this application is respectfully solicited.

Respectfully submitted,

KILLWORTH, GOTTMAN, HAGAN
& SCHAEFF, L.L.P.

APPENDIX
VERSION WITH MARKINGS TO SHOW CHANGES MADE
IN THE SPECIFICATION

Paragraphs at page 5, lines 20-28:

In a preferred application, the sealant is shaped to form a pocket sealer 10 for use in sealing the holes in the body components of vehicles. Figs. 1 and 2 illustrate this use of the invention. Fig. 1 [is a photograph illustrating] illustrates the shaped pocket sealer 10 comprised of the expandable sealant. Fig. 2 illustrates the pocket sealer 10 with the flow control coating on its surface after it has been secured to a cavity on the body of the vehicle and baked for 20 minutes at 325°F (163°C).

Figs. 3 and 4 illustrate the improved flow control obtained by using the flow control agent of the present invention. Fig. 3 illustrates the sag 12 which occurs when the expandable sealant is heated without the use of a flow control agent. Fig. 4 illustrates the sag 14 which
